NEW ABC has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101004640.

Networking the Educational World: Across Boundaries for Community-building

The NEW ABC project is implementing innovative actions across nine EU countries with the aim of increasing the inclusion of migrant children, young people and refugees in their host societies.

The actions involve various educational institutions and engage all actors who play a role in the

educational inclusion of migrants: public schools, CSOs and local NGOs, teaching and intercultural centres, communities and families.

Since the project got underway, numerous resources for formal, informal and non-formal learning have been co-created together with teachers and children.

Project aims

- ✓ to co-create and disseminate good practices for inclusion based on the real needs of migrant children and young people
- ✓ to raise awareness among migrant children and young people about their role in the design of educational institutions
- ✓ to create synergies at local, national and European level that are both horizontal (between different schools and associations) and vertical (between children, teachers and policymakers)
